

Name: Maverick R. Tajanlangit

UI Replication Activity

General Instructions: Recreate the provided profile UI in Flutter, ensuring accurate UI replication, proper use of widgets, variable-based data, appropriate data types, image assets, and fallback values for missing data.

Grading Criteria:

Criteria	Description	Points	Score
UI Replication Accuracy	Accurately reproduces the provided game UI, including overall structure, positioning, proportions, and major elements.	30	
Widget & Layout Structure	Correctly uses Text , Column , Row , Card , and appropriate layout widgets to construct the UI.	20	
Data Variables	All displayed data is declared as variables and uses appropriate data types.	20	
Dynamic Data Display	Variables are properly connected to the UI so changing the data changes the displayed content.	10	
Fallback / Missing Data	Missing or unavailable data has appropriate fallback values or visuals instead of leaving a broken/empty UI.	10	
Assets & Images	Correctly uses project assets and displays the required images, preferably through image variables.	5	
Styling & Visual Details	Applies appropriate colors, typography, spacing, borders, cards, and other visual details from the reference.	5	

Total

100

Insert your application screenshot here:

The screenshot shows an IDE interface with a project named 'ITE301A_Tajanlangit'. The file explorer on the left shows the project structure, including folders like '.idea', 'EXAM', 'exam_2', and files like 'main.dart'. The main editor displays the 'main.dart' file with the following code:

```
1 import 'package:flutter/material.dart';
2 void main() {
3   runApp(const MyApp());
4 }
5 class MyApp extends StatelessWidget {
6   const MyApp({super.key});
7   @override
8   Widget build(BuildContext context) {
9     return MaterialApp(
10       debugShowCheckedModeBanner: false,
11       theme: ThemeData.dark(),
12       home: const SocialPage(),
13     );
14   }
15 }
16
17
18 class MyHomePage extends StatefulWidget {
19   const MyHomePage({super.key, required this.title});
20
21   // This widget is the home page of your application. It is stateful, meaning
22   // that it has a State object (defined below) that contains fields that affect
23   // how it looks.
```

The right sidebar shows a preview of the application running on a Pixel 8 API 37.1 emulator, displaying a screen titled 'Match Details'.

The terminal at the bottom shows the following output:

```
directory.
Please ensure that the SDK and/or project is installed in a location that has read/write permissions for the current user.

PS C:\Users\admin\OneDrive\ITE301A_Tajanlangit\exam_2> flutter run -d emulator-5554
Flutter failed to delete a directory at "C:\Users\admin\OneDrive\ITE301A_Tajanlangit\exam_2\ios\Flutter\ephemeral\packages\packages". The flutter tool cannot access the file or
directory.
Please ensure that the SDK and/or project is installed in a location that has read/write permissions for the current user.

PS C:\Users\admin\OneDrive\ITE301A_Tajanlangit\exam_2>
```

The status bar at the bottom indicates the current file is 'main.dart' in the 'lib' directory of the 'exam_2' project, with a cursor at line 13, column 7. The encoding is UTF-8 and the line ending is CRLF.
